EXPERIENCE.

UX Design Intern / Nanoleaf — Jan. 2022 - April 2022

- Created UI & UX designs for various mobile & desktop app features using **Figma**, delivering **high-fidelity** prototypes and engaging user experiences.
- Improved user experience by **writing** and conducting several **moderated user tests** through **UserTesting.com** and **UserBerry.com.**

Fullstack Developer / CI Technologies — Sept. 2022 - Dec. 2022

- Created revamped UI and updated **user flow** for a software's main portal.
- Designed new features and created **interactive** prototypes for various software using **Figma** while keeping into account the existing **design system**.
- Implemented and improved web application features with Vue, SQL, and Java.

Graphic Designer / Kurius — Sept. 2021 - present

- Developed unique **promotional material** and **assets** for various platforms to increase brand awareness, using **Figma**, as part of the Marketing Team.
- Collaborated with the Marketing team to brainstorm, and refined designs using **iterative design processes**.

PROJECTS.

RENDEZVOO — Nov. 2022

- Designed an application to help employers and employees plan trips with ease by building a **high-fidelity**, **interactable** prototype using **Figma**.
- Established a clear, consistent brand via a **design system**, which included typography, a palette, various components, and margins.
- Used strategies such as **stakeholder maps**, **user personas**, and **moderated user tests** to better understand the design requirements.

UW NAVI — Aug. 2022

- Identified the need for a responsive navigation system of the UW campus, and created a **high-fidelity**, **interactable** prototype using **Figma** as a solution.
- **Iteratively improved** the application using methods such as flow analysis, evolving from low to high fidelity screens.
- Built an intuitive **design system** for a cohesive user experience, including iconography, typography, components, and modals, to create a high-fidelity, interactable prototype.

VOLA — Nov. 2021

- **Finalist** among 430 teams in College + Amazon Adobe Design Creative Jam 2021.
- Designed interactive designs for a platform, in which high school students with accessibility needs may efficiently find volunteer opportunities, using **Adobe XD**.
- Created intuitive **user flow**, including improvements from existing competitors, and defined a **design system** to improve user experience.
